

# TAINA ZAGONEL

Architect & Interior Designer

## CAREER INFO:

- Architect & Interior Designer - 13 years of experience;
- Expert in Commercial Projects - 7 years of experience in design and construction;
- Working remotely since 2020;
- Creative and problem solver;
- Control and planning to make feasible projects;
- Experience on site in small/large commercial projects;
- Experience and direct relationship with national and international clients;
- Attentive to identify possible problems that may arise;
- Interest in constant professional and personal learning.

I like to align my creativity with sustainable possibilities, meaning to create solutions that can last longer and/or that can be used as something else in the future.

The world keeps changing and so does the projects we create, that is why I consider it so important to create transformable proposals that can be adapted as new challenges arise.

I am working remotely from Madagascar while I support a big reforestation project where my partner currently works for and also can be more connected to nature.

I wish to collaborate with others, to contribute with my knowledge and skills to live in functional, beautiful and peaceful spaces. I believe all of that can be acquired through architecture and interior design.
